about green energy technologies

Green Energy Technologies LLC (www.getsmartenergy.com) is a privately held company founded in 2006 in Akron, Ohio. The company includes a team of industry leaders in mechanical, aeronautical and electrical engineering, including the former chief engineer of the wind tunnel program at Cleveland's NASA Glenn Research Center.

Green Energy Technologies is the manufacturer of the WindCube®, a unique wind turbine designed specifically for commercial and industrial power users located in urban and suburban settings. As the premier provider of urban wind systems, the company is committed to delivering innovative, reliable technology and providing best-in-class customer support. With the WindCube's superior flexibility, a wide-range of users can now benefit from the power of the wind. It is ideal for everyone from industrial companies to developers with LEED-certified commercial office buildings to electric users in remote locations. WindCube is a registered trademark of Green Energy Technologies.
